ABOUT US

Mekatronik Makina takes excitement and pride in sharing its knowledge and experience for long years with the dear customers.

Since the day of establishment, producing food process machines mainly for dried fruit, Mekatronik Makina has been getting new achievements every passing day by means of its expert team.

It has become the one and only company in quality and reliability as it does not compromise on quality in every stage of the production, and follows the innovations in the sector closely, and can provide rapid solutions for the requirements of the customers, and has been proceeding both national and international operations without cease by means of its corporate structure.

In spite of the fact that it is a medium-sized enterprise, it has been recognized by sector of food machines in a short time and has not given up its principles from the beginning of the establishment year through the importance attached by it on quality and the determination to succeed.

Quality, service, delivery on time and convenient price are always among its unaltered principles.

Working with the principle of "The warranty of success and sustainability in production is honesty and quality in the service", Mekatronik Makina thanks for your close interest and support and will be proceeding to serve today and in the future.

Best wishes...

DRIED GRAPE WASHING AND PACKAGING LINE

Capability of processing products from a minimum of 1 ton to a maximum of 10 tones per hour.

The only address for quality in service... And reliability in quality...

Possibility of special production in different shapes and sizes depending on usage place and purpose...

Ability to process all kinds of grapes grown in Iran-Uzbekistan-Afghanistan-Tajikistan-Kyrgyzstan and Turkey

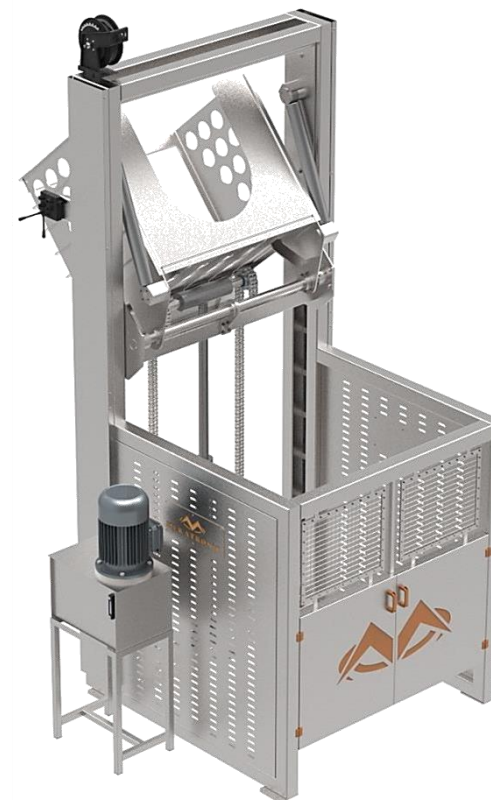

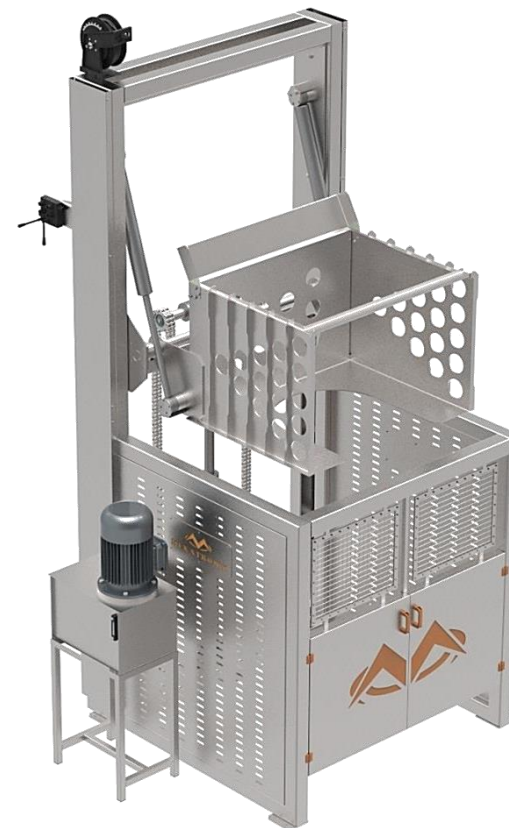

Powerful design, all stainless material production...

CASE OVERTURNING MACHINE

The case overturning machine ensures that the product contained in the basins having standard dimensions is poured into the dosing hopper at the next stage.

Hydraulic and electronic equipment...

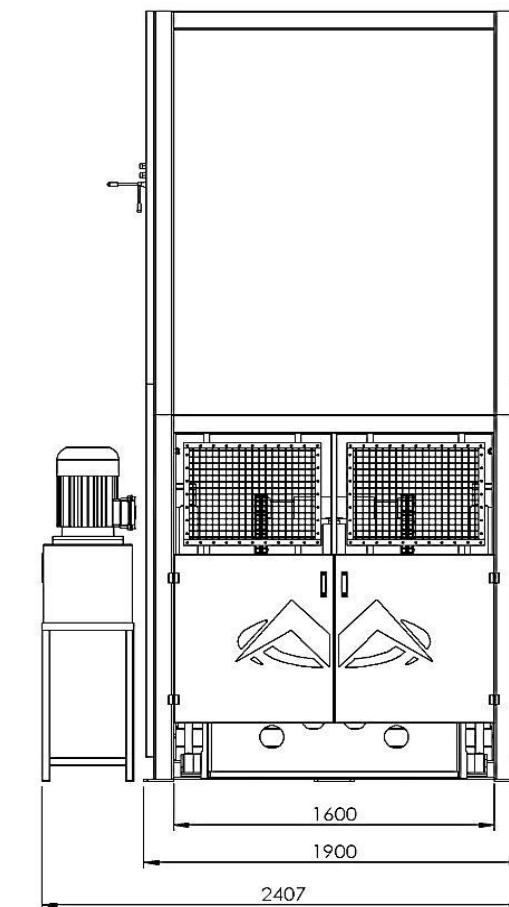

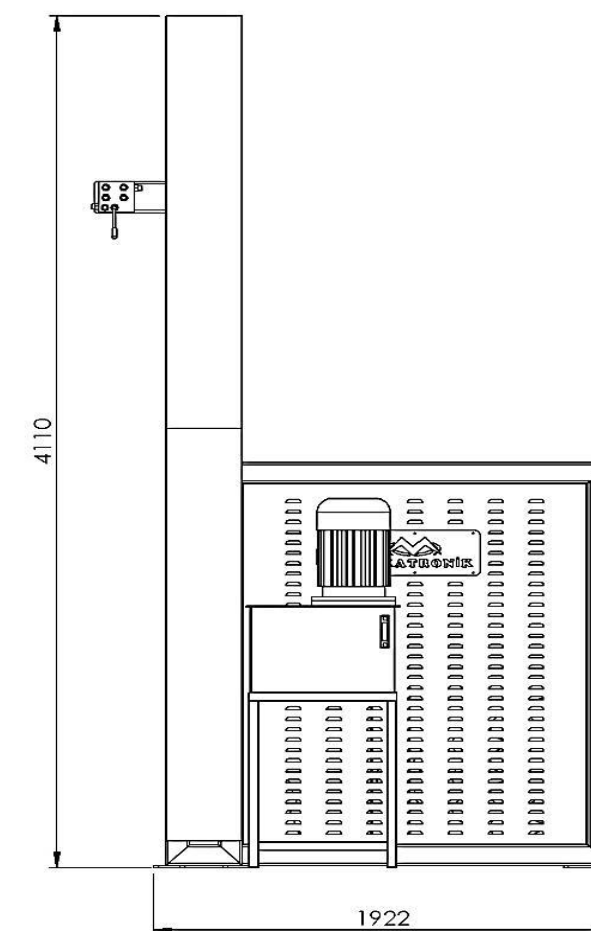

Fast mobility ability and saving from time...

Powerful design, quality workmanship and excellent performance...

Comfortable handling, easy cleaning...

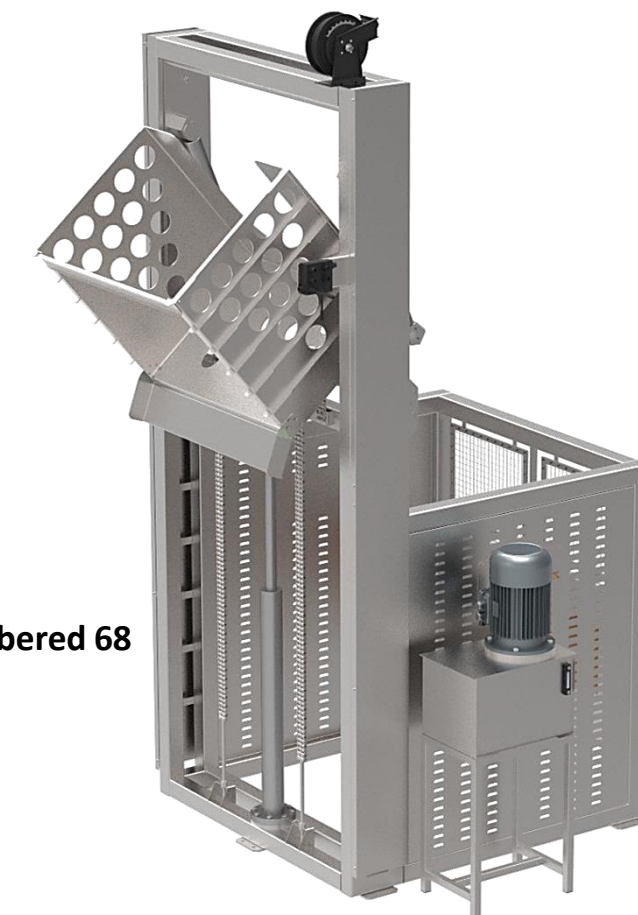

Front covers that prevent accident risk by disabling the system when it is opened...

CASE OVERTURNING MACHINE

TECHNICAL SPECIFICATIONS

Height	: 4110 mm
Width	: 2407 mm
Length	: 1922 mm
Standard Case Dimensions	: 1195x1005x725 mm
Max. load capacity	: 600 Kg
Capacity per hour	: 3 Ton
Movement	: Hydraulic
Used material	: 304-stainless
Used grease	: Hydraulic grease numbered 68
Grease volume	: 90Lt
Engine power	: 11Kw/h
Operation pressure	: 180 Bar
Min. Operation temperature	: 0 °C
Max. Operation temperature	: 40 °C

ANCHOR DOSING BUNKER

Anchor dosing bunkers allow the dosing of the falling product a lot of and in the form of balls, from the case tipped machine.

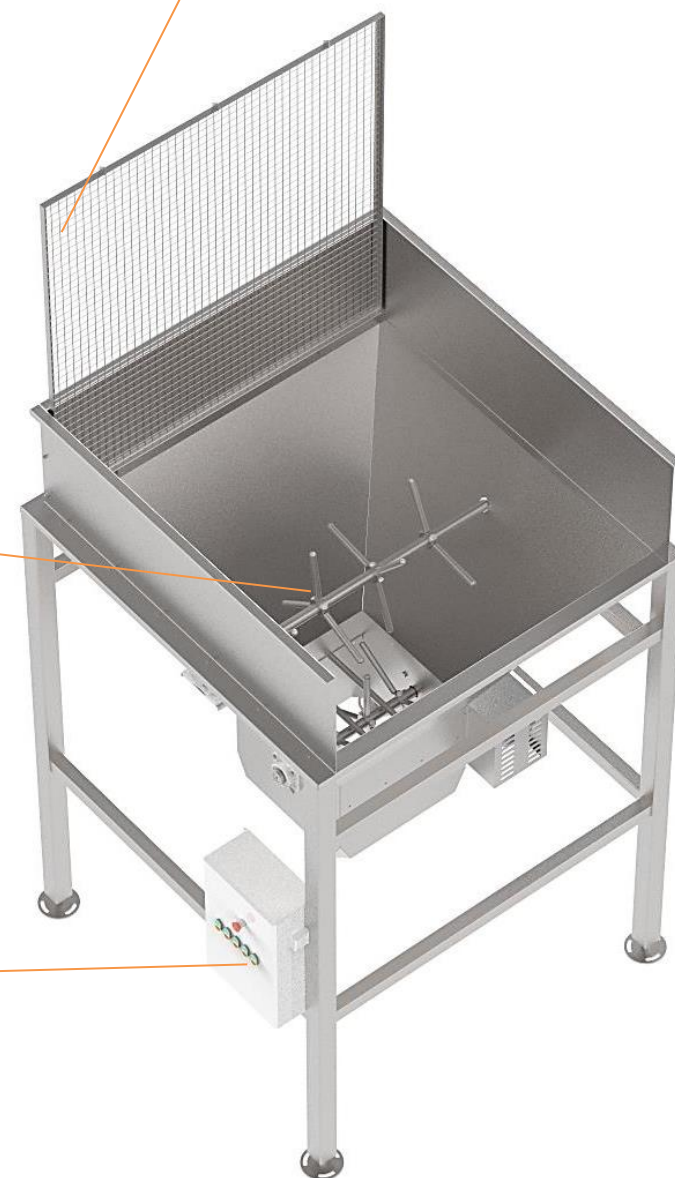

All stainless material...

Gridiron system that provides work safety and cleanliness ...

Thanks to the anchors located in the inner part, the products in the form of balls are separated into smaller pieces and can be easily transferred onto the conveyor belt.

Electronic hand operated control system...

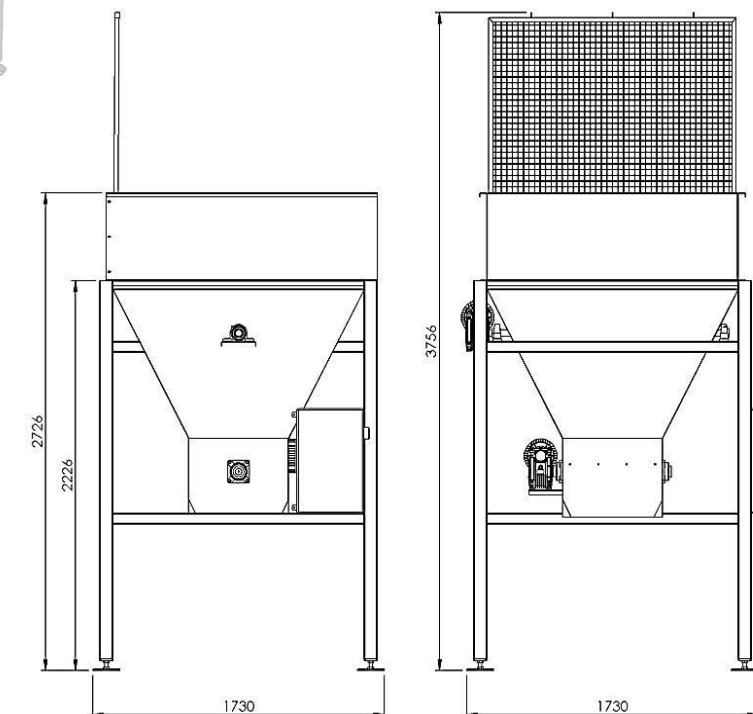

ANCHOR DOSING BUNKER

TECHNICAL SPECIFICATIONS

Height	: 3756 mm
Width	: 1730 mm
Length	: 1730 mm
Standard Case Dimensions	: 1195x1005x725 mm
Max. load capacity	: 500 Kg
Capacity per hour	: 3 Tons
Movement	: Gearmotor
Engine power	: 3 Kw/h
Used material	: 304-stainless

Ergonomic platform designed in accordance with the stair standards from stainless material...

It can be specially produced in different shapes and sizes depending on usage place and purpose!!!

FEEDING CONVEYOR

All stainless material...

Easy cleaning...

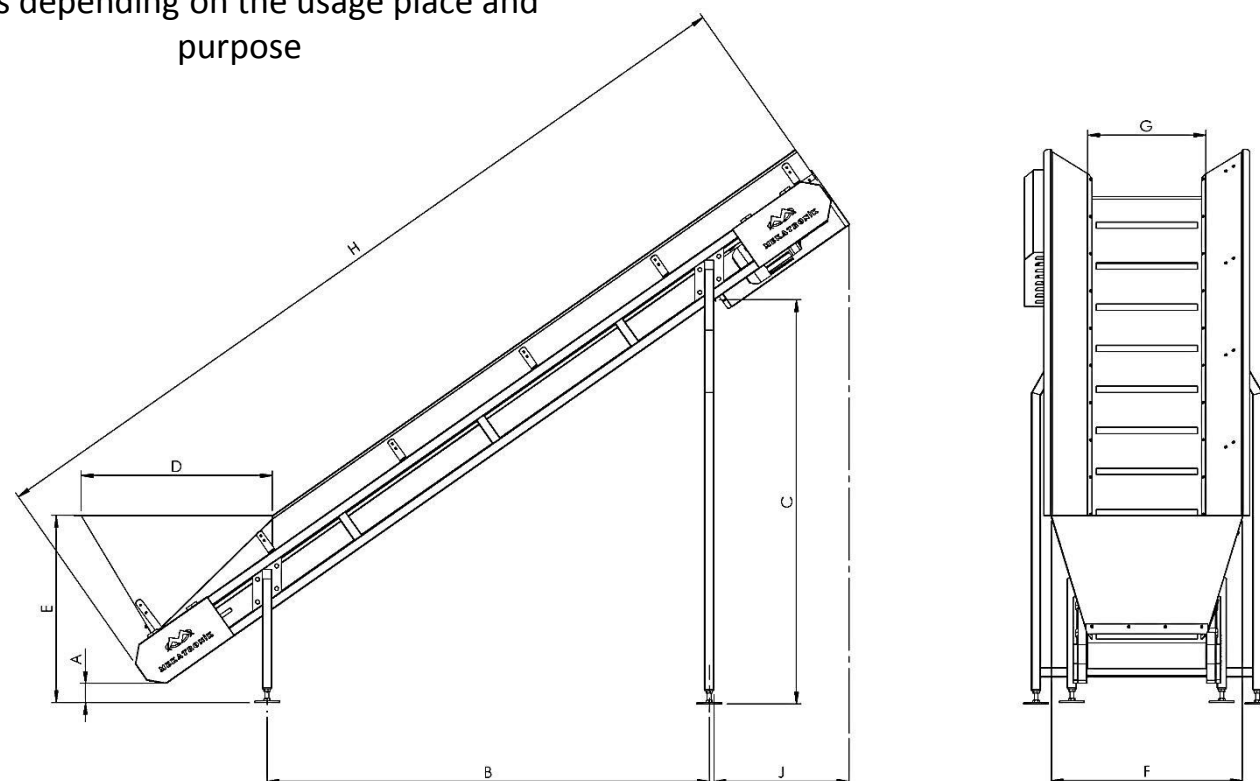

PVC-palletized belt...

Large tank volume...

Optional speed control...

Moving your raw or processed products from one location to another is now much easier with feeding conveyors...

It can be specially produced in different sizes depending on the usage place and purpose

VERTICAL FLATHEAD BREAKING MACHINE

Vertical flathead breaking machine will be your greatest helper in breaking blocks into molded pieces of your products...

Stylish and dynamic design from all stainless material...

Ease of mounting on aspired shaker according to the desired situation...

Easy to wash and clean...

Powerful engine options make it easy to get the desired output...

Thanks to the anchors, master craftsmen of the flathead crushing process, even the most stubborn blocks will be separated into grains...

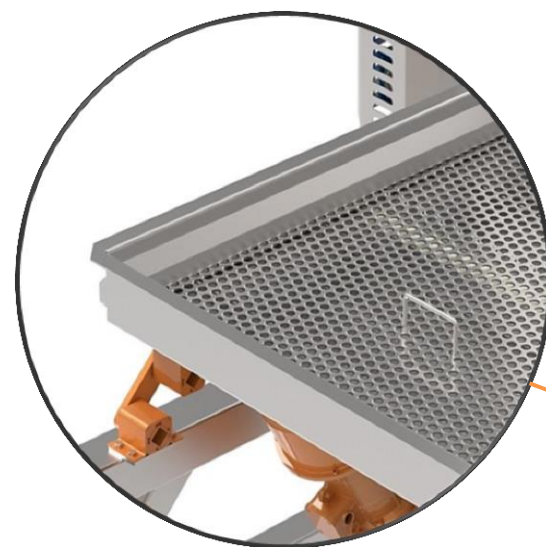

Rigidity will no longer be a problem with adjustable feet designed to prevent any kind of jolts.

ASPIRED SHAKER

Aspired shaker has become the favourite of many company as sifting the objects such as stones, soils , etc. In the fallen products to the screen part, and as enabling of aspirating and disposing unwanted objects such as light leaf, stem, trash etc.

All stainless body, durable oscillation elements, strong vibration and 100% result...

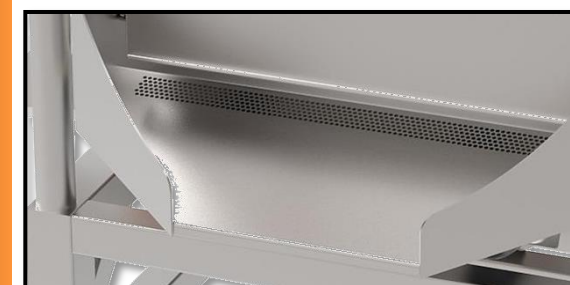

It is up to you to add more value to your products and your operation with highly durable and stainless screens which can be manufactured specially according to each product group...

ASPIRED SHAKER

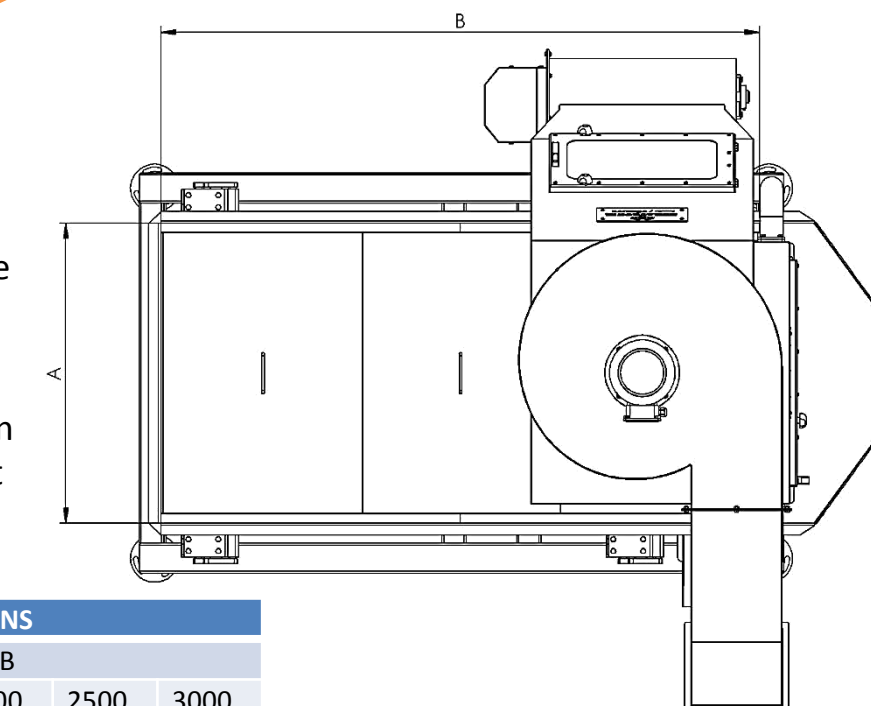

Unlike standard aspired shaker, it provides faster transmission of dust into the aspirator thanks to the blowing capability that is included later...

Capability of grading and distinguishing foreign matter from the products like grape-bean-chickpea-lunar kernel - pumpkin core...

Even the most stubborn trashes hidden amongst the product gave up to resist against to bottom blown aspired shaker. It's competitor's turn.
